

Features

The Tecpro HS591 handset is designed for use in situations where a standard belt-pack and headset would be inconvenient – for example in a theatre foyer, ticket office or corridor. It has most of the functionality of a belt-pack and is suitable for desk top or wall mounting operation.

The electronics are housed in the telephone base and it takes its power from the Tecpro line. It is suitable for sitting on a desk or counter or may be wall mounted with two screws.

Connection to the intercom circuit is made by termination of the supplied RJ cable with an appropriate connector.

The HS591 features an earpiece and electret microphone with tailored frequency response to provide clear, intelligible communication. When the handset is resting in the mic cradle the earpiece and microphone are muted. Lifting the handset activates both the earpiece and microphone and the "Mic On" LED illuminates

Pressing the "Call" button puts a 20KHz tone and a DC signal on to the intercom circuit causing all other call indicators on that circuit to illuminate. The red "Call" LED flashes to confirm function is activated. If a 'Call' signal is received, the red LED flashes to attract attention and the internal buzzer sounds. The buzzer may be programmed to remain silent.

The HS591 responds to 24KHz "Remote Mic Kill" tone. If the handset is in operation and a tone is detected, the microphone circuit automatically mutes. To reactivate the microphone, the receiver should be momentarily replaced in the cradle or alternatively the off-hook button should be pressed.

HS591 Handset Station

- Desk top or wall mounting operation
- Earpiece and microphone mute when handset in mic cradle
- "Call" switch with red LED
- "Call" alert buzzer
- "Mic Live" indicator
- Connection to intercom via RJ11 4/6 with mating lead to bare wire ends
- Earpiece volume preset on rear
- Sidetone preset on rear
- Compatible with previous generation Tecpro designs

TECHNICAL SPECIFICATION

Maximum current consumption: 40mA in 'Call' mode (LED illuminated)
Case material: Grey plastic
Dimensions: 210mm x 70mm x 70mm
Weight: 0.4Kg
